

“Lens Finishing Systems

We have been using [Mr. Orange](#) for several years and are very satisfied with the machine and the customer service that goes along with it. Would recommend!”

– Debbie Kline, Director of Operations, Alpharetta Eye Clinic, Alpharetta, GA

“Lens Finishing Systems

Being a 28-year optical store owner, I have owned and purchased several edgers, including an auto [Mr. Orange](#) edging system. My experience with the Essilor Instruments team far exceeds any other experience by far. Thanks to the personal touch of the sales manager with his customers, I will never own any other edger not made by Essilor.”

– Ester Mozes, Owner, Pearle Vision, Northglenn, CO

“Lens Finishing Systems

The purchasing process of our [Mr. Orange](#) edging system went smoothly, as did the installation and training. The few issues we experienced were handled quickly. The technical support team has been great.

This is our second Mr. Orange system. We purchased one for our other store five years ago, and it is still working well. This has allowed us to cross-train staff as to rotate people from store to store.

”

– Kenneth L. Linenberger, Alpine Optical of Western Colorado, Montrose, CO

“Lens Finishing Systems

We have loved having the [Mr. Orange](#) Edging Instrument in our office! It is easy to use and was a simple solution to increasing our revenue.”

– Rachael Sweeney, OD, , Vision Source Insight Eyecare, Atlanta, GA

“Lens Finishing Systems

[Mr. Orange](#) has changed the way we do business!! This is the second edger from Essilor in my 35-year-old office. We have had it for the past 5 years without an ounce of trouble. It really does what it says it does. Every lens is edged to perfection...most times inserted without heating the zyl frame. If there is an occasional question or problem, our Essilor Instruments sales rep is a phone call away and we have our answer immediately. I highly recommend this product to any office that needs to make a change in the way they finish lenses....from edge to polish to drilling holes...It far surpasses my expectation.”

– Michael Kimmelman, OD, Davie, FL
