Universal Trial Frame UB 6

Perfect Refraction

The trial frame is one of the tools of the trade for every refraction professional. Subjective lens determination requires craftsmanship and manual skill. Your professional competence will be perfectly demonstrated with the new Universal Trial Frame UB 6. In the new product development of the UB 6 we put ergonomics, simple handling and optimal wearing comfort front and center.

Universal Trial Frame OCULUS UB 6 with optional reversible polarizer

Fashioned by hand – scrutinized by high-tech Coordinate Measuring Machines

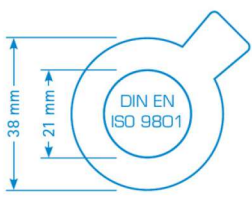

Now, we proudly present the UB 6, made of the finest materials and featuring a new design. Many ideas and suggestions for improvements from our customers have been integrated in the new development: for example, the nose piece and its adjustment options have a fully new construction. Also new is the lens holder, with four slots in front and two behind.

The result is a little masterpiece “Made by OCULUS” – developed according to state-of-the-art knowledge, optimized to fit your everyday practice, and based on more than 100 years of experience.

The UB 6 is the new generation in OCULUS trial frames. Carefully crafted by hand with the highest attention to detail. All materials are optimally fine-tuned in their coordination, inspected, and measured with our 3D-coordinate measuring machine.

Important note

Trial lenses according to DIN EN ISO 9801 with a rim diameter of 38 mm (lens diameter 21 mm), such as the OCULUS trial lens "ti" (trial lens), are compatible with the Universal Trial Frame UB 3+, UB 4, UB 4 höhenverstellbar, UB 6 and Half-eye Trial Frames.
