

The Adaptica vision screener, Kaleidos, is being used on a large scale in hundreds of schools and kindergartens in Liaoning, Hebei, Guizhou, Sichuan, Chongqing, Beijing, Shanghai and other provinces and cities. Here are some images from the vision screenings days:

1. Nanjing First School, Shenyang City, Liaoning Province, screening 1,000 students in half a day

2. Bolin Kindergarten in Panjin City, Liaoning Province, children aged 3-6 can be screened easily without support from parents and teachers.

3. Pingtang County, Qiannan Buyi and Miao Autonomous Prefecture, Guizhou Province, organized by the local county education bureau, health bureau and county people's hospital, is used for physical examination of primary and secondary school students in the county, and more than 80% of primary and secondary schools in the county have been screened.

4. Shunping County, Baoding City, Hebei Province, organized by the local Education Bureau and Health Bureau, and jointly with the local county people's hospital and the county maternal and child health care hospital, undertakes the vision screening work of primary and secondary schools and kindergartens in the county. It has been two consecutive semesters, covering 100% of the county's schools.
